

AKADEMİ SAÇ TERAPİ

16.04.2019

It is a privilege for us to write this reference letter for Pharma Hermetic Hair Recovery Program. We are pleased to inform that we have been using this treatment for 6 months in our Trichology Clinic, in Istanbul, Turkey.

We both combine Hair Recovery Program with our own trichological treatments in the clinic and recommend it as a Home Treatment on its own. So far we have used 15 kits of the treatment with both male and female patients who suffer from Androgenetic Alopecia especially. We have been receiving very positive feedbacks and satisfactory results. We observe that the treatment is promoting hair growth, improving hair density and producing thicker hair.

We have great pleasure to recommend Pharma Hermetic Hair Recovery Programme to all the health professionals, to experts in hair care field, to patients and finally to anybody who wants to improve their hair quality and prevent hair loss and prevent Androgenetic Hair Loss from progressing. This very special formula deserves to be appreciated by many other companies operating in hair care business.

Sincerely,

Evrin Bayraktar, MIT
